

## 6 Smart investment

Our refrigeration blind quickly pays for itself by lowering energy and maintenance costs, as well as reducing product loss.

The fire-retardant reflective metallic fabric used in manufacturing our blinds features excellent insulating properties, which protect your products in the event of a power blackout or equipment failure.

## 8 Durability

Unlike plastic alternatives prone to discoloration and tear, CSS blinds are made to last for years, making them a top choice for value-conscious grocers and display case manufacturers. Enclosed cassette design combined with high-quality materials help achieve high durability.

## 9 Warranty, support & installation

CSS North America provides a standard 1-year product warranty on its blinds. We carry an extensive inventory of spare parts and are ready to provide complete support for all of our products. We possess valuable experience in completing supermarket installations and have a good understanding of the needs and requirements of store management and personnel.

# Energy-Saving Refrigeration Blinds

- Minimize product shrinkage
- Reduce your energy costs
- Go "green", save the planet

## 7 Protect the environment

Now you can equip your store with energy-saving blinds and feel good about it too! When employing CSS night blinds you reduce your store's energy consumption, which cuts down on the CO2 pollution of Earth's atmosphere. In fact, every 100 feet of refrigeration blinds installed at your store remove an equivalent of 7 cars' annual emission, or 43.6 tons of CO2 and other poisonous gases. Interestingly, 218 trees would need to be planted to offset this amount of carbon dioxide emission.

Your customers will appreciate your efforts to save the environment.

## What is a refrigeration blind?

Refrigeration blinds operate by keeping cold air inside a display case, where it belongs, for much more efficient cooling of perishable products during the closing hours of a store.

Our energy-saving blinds operate effectively on both upright and bunker cases in all areas of the store where display cases are used. The blinds are offered as a factory-installed accessory from major display case manufacturers, or are installed on existing or new refrigeration cases, as requested.

Our blinds work on all types of display cases, including:

- Meat
- Produce
- Deli
- Seafood
- Dairy
- Beverage
- Frozen food
- Bunkers

# stop blowing away your profits!

By installing our refrigeration blinds you will substantially improve your store's profitability by reducing energy expenditures, cutting down product shrinkage and minimizing maintenance costs. This investment will go hand-in-hand with your other "green" initiatives.

## The advantage

Our thermoshield blinds provide simple and effective insulation for refrigerated display cases during a store's closing hours and save money by lowering energy costs, reducing maintenance costs and extending product shelf life.

The following are the main reasons to purchase our refrigeration blinds today, and to receive some of the best value in energy-saving technology.

# reduce your product shrink and energy costs!

### 1 Reduce energy costs

When the blind is drawn, the superior insulating properties of its reflective metallic fabric maintain a stable, optimal temperature inside the display case. This reduces your compressor load by up to 40% overnight, thus lowering your energy consumption.

## 9 reasons to invest in CSS refrigeration blinds

### 2 Extend product shelf life

By shielding perishable food products from heat and ultraviolet radiation our night blinds extend the shelf life of those products. In addition, tiny perforations in the fabric prevent condensation from collecting inside the display case and eliminate potential ice buildup.

### 3 Reduce maintenance costs

Our refrigeration blinds reduce store maintenance costs by keeping the temperature inside your coolers constant, which effectively reduces the compressor load. As a result, your compressors will last longer and require less maintenance.

### Product Specifications

#### FABRIC

- Fire-retardant, washable, metallic
- Superior insulating properties
- Reflective, anti-UV, mold-resistant
- High tensile strength woven base

#### CASSETTE

- Enclosed aluminum cassette
- Standard Width: 4', 6' (1,219 mm, 1,823 mm)
- Standard Length: 6' (1,823 mm)
- Custom sizes available

### 4 Fast payback

Thermoshield night blinds marketed by CSS North America are competitively priced, making them a value leader among today's energy-saving blinds. Payback is usually less than 1 year, depending on the cost of electricity, type of equipment and number of hours the store is closed.

### 5 Decrease heating costs

Our energy-saving blinds help reduce store heating costs during winter months. They effectively prevent the refrigerated air inside the display case from escaping into the store.
